2. Purchasing Binary Options and Using NatureForex Trading Platform

Choosing your preferred Binary Options Instrument.

NatureForex offers trading of Binary Options with High/Low; Choice 6; Range In/Out and Ladder options instruments. Each has its unique benefits that the customer can use depending on the market and the customer’s preferences.

High/Low Options credits you profit if the price of the underlying asset ends up above or below the expiry price of the options you chose. Select “High” if you believe the expiration rate will rise above the current rate, or select "Low" if you believe the expiration rate will fall below the current rate.

Choice6 Options guarantees profit as same as High/Low Options. However, at this type of options, customers have the opportunity to choose the target price from six available prices.

Range In/Out Options allows you to choose ranges of target price. End term price just needs to be “In” or “Out” of the Range you predicted and chose. This options brings traders more chances to win. Before “Closed” time for trading, you will be able to sell your orders to reduce the risk and loss that you think might happens.

Ladder Options – There are 5 levels of target price. Each target price allows customers to request orders Call and Put. With target price will provide different Call and Put price
2.2 Placing an order

2.2.1. How to place an order for High/Low options.

**Step 1:**
Choose the Currency Pair that you would like to trade and Insert investment amount.

**Step 3:**
Select HIGH or LOW options
If your order is successful, “Successful” pop up will show on your screen:

You can choose to buy only options with the “Open time” available (Ranging from “Open” to “Close”). With the option that appears as “Waiting time”, you cannot choose as these options will be open at later time.
2.2.2 How to place an order for Choice6 option.

**Step 1:**
The Currency Pairs will appear on the box listed on the left:

![Currency Pairs Display]

**Step 2:**
Select one of six options in Choice6 display then choose the amount you would like to invest:

![Choice6 Display]

- **The 3 High Options to buy** when you expect the End Price will be higher than Target Price
- **The 3 Low Options to buy** when you expect the End Price will be higher than Target Price

**Invested amount**

![Invested Amount]
Clear: To delete the amount you place.
Order: To place an order.

One Click Order:

In On status: the order will be executed instantly when you choose High or Low.
In Off status: the order will be executed manually when you choose High or Low, then press “Execute” button. You can use Off status if you want to confirm your decision again.

Once you decide whether you believe the value of the underlying asset will go up or down by the expiry time, you select how much you would like to invest.

<table>
<thead>
<tr>
<th></th>
<th>Minimum investment</th>
<th>Maximum investment each customer each term</th>
<th>Maximum investment for total customer each term</th>
</tr>
</thead>
<tbody>
<tr>
<td>High/Low; Choice 6</td>
<td>3 USD</td>
<td>100 USD</td>
<td>400 USD</td>
</tr>
<tr>
<td>Rangeln/Out; Ladder</td>
<td>3 lots</td>
<td>50 lots</td>
<td>100 lots</td>
</tr>
</tbody>
</table>

If you want to increase your investment, you can choose 3 levels of money appearing:
Step 4:
Select one out of **three** options of High or Low

After you confirm, your screen will appear like below:
You can choose to buy only options with the “Open time” available (ranging from “Open” to “Close”). With the option that appears as “Waiting time”, you cannot choose as these options will come at later time:

2.2.3 How to place an order for Range In/Out options

Step 1: Choose the currency pair you would like to trade

Step 2: Choose your range of end price prediction
If you choose Range In options; your end term price (Strike price) is required to stay within the relevant range you already chose in order to get profit; if out of the range, you will lose.

On the other hand, when you choose Range Out options, your end term price is required to ends outside of the range you chose at the beginning to win, if end price stays inside your range, you will lose.

<table>
<thead>
<tr>
<th>RANGE</th>
<th>Win condition</th>
<th>Loss condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>IN</td>
<td>Low Price of range = or &lt; Strike Price &lt; High Price of range</td>
<td>+ Strike price &gt; High Price range &lt; High Price range + Strike price &lt; Low Price range</td>
</tr>
<tr>
<td>OUT</td>
<td>+ Strike Price = or &gt; High Price of range + Strike Price &lt; Low Price of range</td>
<td>+ Strike Price &lt; High Price of range + Strike Price &gt; Low Price of range</td>
</tr>
</tbody>
</table>

Step 3: Input the trading volume and Execute order
2.2.4 How to place an order for Ladder options.

**Step 1:** Choose the currency pair you would like to trade and amount of money you will invest.

**Step 2:** Choose Call or Put Options
If you choose Call for your trading currency pair; if end term price equals or higher than your strike price you will win; if your strike price smaller than end price, you will lose

In contrast, when you choose Put options, when end term price is lower than your strike price, you will win; if your strike price is higher or equal to end term price, you will lose

3. Closing Your Binary Options

Now you have an open position. You can wait for the Binary Options expires. Once you have opened the position in High/Low or Choice 6 options you cannot close the position before it expires.

However, you will have chance to close (sell) your order before ending Execution time in mode Range In/Out and Ladder
4. **Trade box explanation.**

After performing a trade action, the action appears as a data marker on the chart and the details of the open trade are visible in the bottom box below the Trade Box as shown on the image below:

**4.1 Position:**

All your purchased and opened options for the instrument you have selected (High/Low; Choice6; Range In/Out and Ladder) can be found in the Position box displayed in the trade box window. The Box also shows all recently executed options, which may include also recently closed positions.

**Sell:** in **Range In/Out and Ladder Mode**; during Execution time (between Opened and Closed time shows on screen chart for placing orders); you will have possibility to sell your order with relevant price and Profit/Loss shows on screen. This function brings you opportunity to reduce loss or gain higher profit than end price.

**4.2 Account History**

Account History will display all the details of your transactions.

You can search your history orders by relevant categories show on screen
4.3 End Price List

In here you can view End Price of each Term
